## REMARKS

Claims 1-18 are pending in the application. Applicants have amended claims 1-4, 10 and 12. Applicants respectfully request reconsideration of the application.

## 35 U.S.C. § 102 (b)

The Examiner rejected claims 1-18 under 35 U.S.C. § 102(b) as being anticipated by Gonno (EP Patent No. 000876023; 4 Nov. 1998). For anticipation under 35 U.S.C. 102, the reference must teach each and every aspect of the claimed invention either explicitly or impliedly. (MPEP 706.02.)

In the office action mailed December 30, 3003, the Examiner states "[A]s per claims 1 and 10, Gonno discloses an equivalent means for providing frame re-transmission in a broadcast communication system comprising; a receiver (col. 4 line 9 and col. 5 lines 9-10 for receiving a message indicative of a frame received in error by a wireless communication device, said message including an identification of said frame; a memory (col. 4 line 27; (e.g., if an error is detected at the receiver, a NAK or repeat request is issued thereform to the transmitter so that the frame marked as erroded is to be retransmitted, said receiver/transmitter having storage means to hold/process such request.) for storing a predetermined number for determining when to retransmit said frame; and a processor (col. 4 line 11) for determining a cumulative number of times that said frame was received in error and for ordering a re-transmission of said frame if said cumulative number of times is greater than said predetermined number (e.g., if predetermined is zero, there is no frame retransmission, otherwise, the frame is retransmitted)."

However, Claims 1-18, as amended, are not anticipated by Gonno for the reasons provided below.

Claims 1 and 10 are amended to include the limitation of identifying the wireless communication device. Claims 2 and 12 are amended to remove this limitation. Amended Claims 1 and 10 include the limitation of identifying the wireless communication device.

Attorney Docket No.: 010401

Customer No.: 23696

**PATENT** 

Nowhere in Gonno is identification of the wireless communication device taught or suggested.

While Gonno teaches totaling means which can total the retransmissions from one or more

receivers, Gonno does not teach identifying the one or more receivers. That is as one or more

receivers request retransmission the total number of retransmissions increases. Gonno only

teaches totaling the request for retransmissions whether they come from one receiver or more

than one receiver. Thus, Gonno does not teach each and every limitation explicitly or impliedly.

Therefore, claims 1 and 10, as amended, are not anticipated by Gonno. Since Claims 2-9 depend

on Claim 1 it follows they are also not anticipated by Gonno, and since Claims 11-18 depend on

Claim 10 it follows they are also not anticipated by Gonno.

For the reasons provided above, Examiners allowance of claims 1-18 is appreciated.

REQUEST FOR ALLOWANCE

In view of the foregoing, Applicants submit that all pending claims in the application are

Accordingly, reconsideration and allowance of this application are earnestly

solicited. Should any issues remain unresolved, the Examiner is encouraged to telephone the

undersigned at the number provided below.

Respectfully submitted,
